DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin on Parker.

The application has been amended as follows:

In claim 11, line 2, after "channels" insert --at a selected time--.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Repeating the capture verification test with the raised or lowered pacing pulse energy at a selected time as claimed is not taught nor suggested by the prior art of record. Further, lowering or raising a pacing pulse energy by a specified amount if capture was present or absent, respectively, does not appear to be an obvious variation of raising or lowering a pacing voltage from a first voltage level by a specified amount if capture was present or absent, respectively, as taught in U.S. Patent 6,615,089.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
